

The diagram illustrates the Card Issuer's (10) connections to various entities. The Card Issuer (10) is centrally located and connected to seven other entities via lightning bolts, indicating a secure or high-speed connection. The entities and their IDs are:

- Card CA/TTP (14)
- Customer Support Services (20)
- Card Manufacturer/Personalization Agency (16)
- Application Provider (12)
- Registration Authority (18)
- Application CA/TTP (14')
- Application Provider (12)
- Card Terminal Server (22)

```
graph TD; CA14[Card CA/TTP 14] --- CI10[Card Issuer 10]; CSS20[Customer Support Services 20] --- CI10; CMA16[Card Manufacturer/Personalization Agency 16] --- CI10; AP12[Application Provider 12] --- CI10; RA18[Registration Authority 18] --- CI10; ACA14[Application CA/TTP 14'] --- CI10; AP2[Application Provider 12] --- CI10; CTS22[Card Terminal Server 22] --- CI10;
```

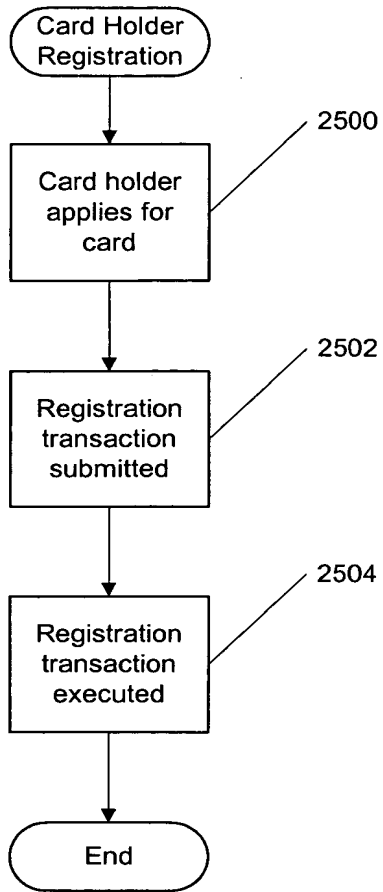

Figure 25

```
graph TD; Start([Card Personalization and Issuance]) --> 2600[Prepare order for cards]; 2600 --> 2602[Card issuance transaction submitted]; 2602 --> 2604[Personalization and issuance process invoked]; 2604 --> 2606[Personalization data gathered as bill of materials]; 2606 --> 2608[Order sent for approval]; 2608 --> 2610[Order with personalization bill of materials sent to PA]; 2610 --> 2612[Response from PA when task complete]; 2612 --> End([End]);
```

Flowchart 2600 illustrates the Card Personalization and Issuance process. The process begins with the start node, leading to the step 'Prepare order for cards' (2600). This is followed by 'Card issuance transaction submitted' (2602), then 'Personalization and issuance process invoked' (2604). The next step is 'Personalization data gathered as bill of materials' (2606), followed by 'Order sent for approval' (2608). The process continues with 'Order with personalization bill of materials sent to PA' (2610), then 'Response from PA when task complete' (2612), and finally ends at the 'End' node.
